L.dz.ZIL-41/2015

### **Confirmation of the successful execution of the COST Short Term Scientific Mission under Action SaPPART by L-F Pau, Professor CBS, Denmark**

COST TU1302- SaPPART  
Mr Todor Stoilov  
STSM Coordinator c/o  
IICT Bulgarian Academy of Sciences  
1113 Sofia Bulgaria

With this letter I confirm that L-F Pau, Professor CBS, Denmark, stayed at Department of Forest Engineering, University of Agriculture in Kraków for a Short Term Scientific Mission in the frame of the SaPPART COST Action from July 08, 2015 to July 15, 2015.

Prof L-F. Pau worked very efficiently on the analysis of GNSS accuracy implications in high tech farming and forestry exploitation especially for moving forestry vehicles. All planned tasks have been completed. The result is a huge database. The model specification got further refined based on the field work, as such type of models are available nowhere. The subject is difficult and relatively unexplored. Discussions with industry people showed that GNSS techniques are not much used yet in forestry. The reason is the lack of clear guidelines as to the accuracy. There is a great need for cooperation in this field.

He was very keen and well integrated into the Polish research multidisciplinary team. His STSM – presentation, seminary, working in groups and also meetings with practical foresters - was an opportunity to expand knowledge about COST Actions, and SaPPART in particular.

Prof L-F. Pau compiled an excellent report about his short term mission. The report will be basis for a common publication, which may become a valuable deliverable of the TU1302 SaPPART COST Action.

Yours faithfully,

*Anna Klamerus-Iwan*
